Why Python?

- A report in [The Economist](#) named Python the world's most popular coding language, with steady stats and growth attributed to its flexibility as well as its straightforward, simple syntax. - *Women Who Code*

Why Do We Love Python?

The Pythonistas Say;

- Simplicity
- Flexibility
- Accessibility
- Straight forward Syntax
- Integrations
- Libraries
- Debugging
- Forgiving
- Modular

Useful For;

- Programmable Logic Devices
- Web Development
- Data Science
- Server Infrastructure
- Communications Services
- Prototyping

Code of conduct

Ranking of programming languages*

US, Google searches for coding languages
100=highest annual traffic for any language

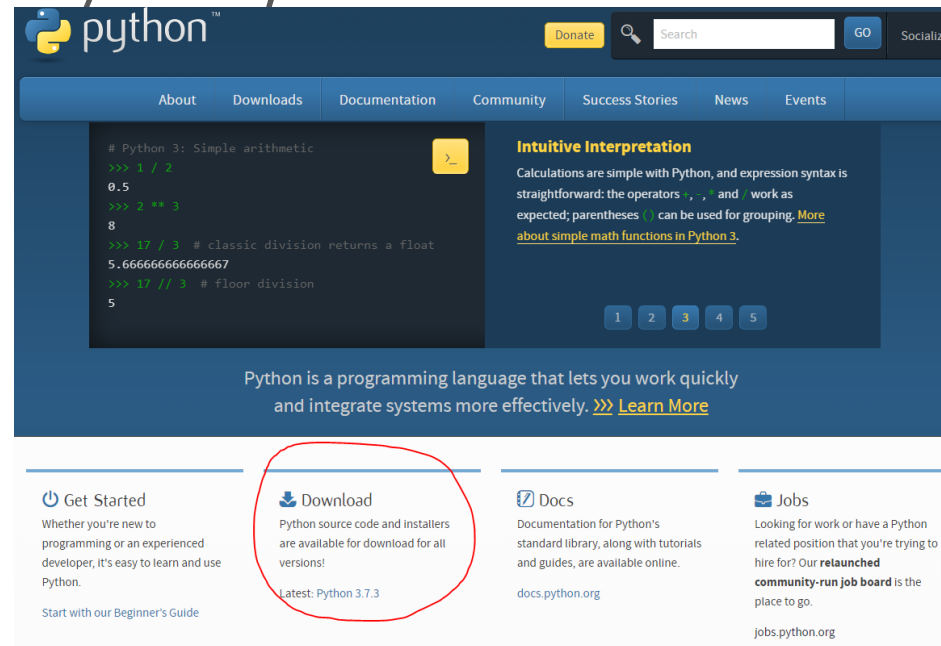

Source: TIOBE, Google Trends

*Ranked by global search-engine popularity

How to Start Using Python

- Visit <https://www.python.org/>
- Download an installer for your operating system;

The screenshot shows the Python.org homepage. At the top, there's a navigation bar with 'About', 'Downloads', 'Documentation', 'Community', 'Success Stories', 'News', and 'Events'. Below this is a main content area with a code snippet on the left and an 'Intuitive Interpretation' section on the right. At the bottom, there are four columns: 'Get Started', 'Download', 'Docs', and 'Jobs'. The 'Download' link is circled in red.

Version	Operating System
Gzipped source tarball	Source release
XZ compressed source tarball	Source release
macOS 64-bit/32-bit installer	Mac OS X
macOS 64-bit installer	Mac OS X
Windows help file	Windows
Windows x86-64 embeddable zip file	Windows
Windows x86-64 executable installer	Windows
Windows x86-64 web-based installer	Windows
Windows x86 embeddable zip file	Windows
Windows x86 executable installer	Windows
Windows x86 web-based installer	Windows

- Run the installer.
- That's it, you can now code.... Sort of.

Let's Run Some Code

- Command Line Example
- Command Line Run File
- Coding in an Integrated Development Environment (IDE)
 - Visual Studio Code (VSCode)
 - Fantastic VSCode Video Tutorial;
<https://www.youtube.com/watch?v=-nhgrCzPJ2o>
 - Less exciting Microsoft text tutorial;
<https://code.visualstudio.com/docs/python/python-tutorial>

You Must!

- Use the pip package manager
 - Links into the Python Pack Index and installs packaged modules for you
 - ->> pip install requests

Tools For Life

IDEs

- PyCharm
- Atom
- Spyder
- IDLE
- Visual Studio Code

Popular Libraries

- Datetime
- NumPy
- Pandas
- SciPy

Standards

- Syntax Standards
- Testing

Other Things

- Git
- Virtual Environment

5 Minutes Audience Suggestions

1

2

3

4

5

- fstring for command line output
- Jupyter Notebooks
- Talk Python Podcast
- Python Byte Podcast
- Mac discontinuing pre-installed python
- Windows incorporating pre-installed python
- Be sure to ask natural language (clear) questions on help boards
- Join a community board
- Tutorials on python.org
- Homebrew
- Anaconda pre-packaged installation of Python
- Python is everywhere
